

Acoustic Technicians Needed

Due to the continued success of our client-centred approach, Resound Acoustics is actively seeking hardworking and motivated individuals to join the team at our head office in Warwickshire in the Midlands.

Resound Acoustics is an independent consultancy specialising in the delivery of high quality noise and vibration assessments across a wide and interesting range of projects for national and international clients. We are a small, friendly company with great professional values, and we would be interested to hear from candidates who have the drive and flexibility to join our growing business at an exciting time in its development.

We are seeking applications from candidates for the following role:

Technician

This is an entry-level role for someone wishing to start a career in acoustic consultancy and no prior experience is necessary. Candidates will be expected to be flexible, hard working and reliable, and show a willingness to learn on the job.

Initially the successful candidate will be primarily engaged in survey work in the field using technical equipment, using state of the art noise modelling software and data handling/analysis in Excel. Full training in all aspects of consultancy work will be available to those keen to progress their career with funding provided for formal education and qualifications through the Institute of Acoustics. The work will involve hours outside normal working hours, including some evenings, nights and weekends, but time off in lieu or overtime is provided.

Candidates should have the following:

- high level of numeracy, including the ability to analyse data and use mathematical equations
- accurate and clear writing skills
- excellent computer literacy with the ability to learn proprietary software packages and design programmes
- the confidence to communicate with a wide range of people
- the ability to work carefully with technical equipment
- a full, clean driving licence and the willingness to travel to sites throughout the UK

We would be delighted to hear from individuals who feel they could fit the above roles. In return Resound Acoustics offers competitive salary packages, flexible hours and a supportive working environment.

CVs should be emailed to: info@resoundacoustics.co.uk
